

Call for Applications for a Post-Doctoral Position

A post-doctoral position is available in Integrated Quantum Electronics group at Institute of Industrial Science (IIS), the University of Tokyo, Japan.

A post-doc fellow will be hosted as a Project Research Associate or Project Researcher at IIS, Univ. of Tokyo. This position is eligible for a contract until March 31, 2016, under the standard salary and work status at the institute. Contract starts according to candidate's constraints.

Deadline

June 30, 2014 or when a proper candidate is found.

Research topic

Thermal conduction nanoengineering and application to energy harvesting by thermoelectrics.

Preferable skills: Si processing, electrical measurement, optical measurement

Requirements

Researchers holding a doctoral degree or having fulfilled all the obligations of a PhD (certified by their supervisor).

Applications

Formal applications will include:

- a 1-2 page CV
- a 1-2 page summary of the current research
- a list of publications
- a 1-2 page research proposal including how you can contribute to the project
- contact information of two professors, who know you well
